

MS 2 Recap

Sunday, September 27, 2020 9:09 PM

Recap

We discussed milestone 2 and divided up the work (**details below**) for part 1 - "HTML mockup along with flows"

Our goal is to have ~90% or more of the mock up ready to go by our meeting time **next Sunday**. By that time we will want to change our focus to the 2nd part of Milestone the feedback, assumption is some sort of usability study?

Admin stuff

- Tyler will present Milestone 1 on Tuesday
- We set up a github team repo
 - <https://github.com/TriangularArbitrary/TriangularArbitrary>
 - Everyone should clone the repo
 - There will be folders for each milestone to house the artifacts.

Mitchell Ergen 7:25 PM

FYI on cloning a .git repo to current command line directory --> <https://git-scm.com/book/en/v2/Git-Basics-Getting-a-Git-Repository> TLDR; should be as easy as "git clone <https://github.com/TriangularArbitrary/TriangularArbitrary>"

GitHub

PART 1

Component / Page	Who	Notes
*Login	Eric	+ Google Analytics
Navigation skeleton	Mitchell	
*Create Account / My Account	Eric	Preferred currency Account type
Create Ticket	Mitchell	
*Favorites	Kevin Lineback	Firebase
*Search	Kevin Lineback	
*Top 10	Tyler	
*Conversions	Tyler	
Account Administration		
Manage Ticket Queue	Kevin Looft	
Manage Accounts	Kevin Looft	Remove / freeze accounts

We will work with Bootstrap for applying a basic, but consistent design for our mockup
Reference the CDN in your header then utilize the information on sites such as w3schools for usage information
<https://getbootstrap.com/>

BootstrapCDN

When you only need to include Bootstrap's

```
<!-- CSS only -->
<link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/bootstrap
```

BootstrapCDN

When you only need to include Bootstrap's compiled CSS or JS, you can use [BootstrapCDN](#).

See it in action with our simple [starter template](#), or [browse the examples](#) to jumpstart your next project.

[Explore the docs](#)

```
<!-- CSS only -->
<link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/bootstra

<!-- JS, Popper.js, and jQuery -->
<script src="https://code.jquery.com/jquery-3.5.1.slim.min.js" integrity
<script src="https://cdn.jsdelivr.net/npm/popper.js@1.16.1/dist/umd/popp
<script src="https://stackpath.bootstrapcdn.com/bootstrap/4.5.2/js/boots
